

Welcome Message from the President of Assumption University

I am happy that Assumption University has been invited to co-host the International Conference on Information Technology that will take place in March 2009. I believe that this will be an important opportunity to talk and listen to the participants of the Conference, all leaders in the field of Information Technology. I am certain that the Conference will present a broad range of cutting edge research in the field, which is so important for the continued development of the Thai economy and society.

I am especially pleased, however, that the Conference is being convened to celebrate the 72nd birthday of our own Prof. Dr. Srisakdi Charmonman. Recognized for his leadership role in the development of computer technology in Asia, and also as the “Father of Thai e-learning,” his contribution to Thai technology, and to Assumption University, cannot be under-estimated. It is very appropriate that so many academic and industry leaders will honor this great man by gathering together to continue the technological advance that has been his life’s work. May God continue to shower good health and prosperity on Prof. Dr. Srisakdi Charmonman and allow him to continue to contribute to the growth and development of Information Technology in Thailand.

I wish to join in with the many who wish Dr. Srisakdi a wonderful birthday and also wish that the members of the Computer Association of Thailand and all participants of the Conference have an enjoyable and productive meeting.

A handwritten signature in black ink, appearing to read 'Bancha Saenghiran', written over a horizontal line.

**(Rev. Bro. Bancha Saenghiran, FSG., Ph.D.)
President , Assumption University**
